Dry vs Dehydrated skin

SKIN TYPE (Oil Level)

DRY SKIN
Lacks natural oils

NORMAL SKIN
Perfect balance
of oils

COMBINATION
Oily T Zone,
normal cheeks

OILY SKIN
Oiliness all over

SKIN CONDITION (Water Retention Level)

DEHYDRATED SKIN
Lacks water and hydration

Dry Skin

Skin type caused by
lack of oil production

Dehydrated Skin

Skin condition caused by
lack of water retention
inside your skin

You can actually have an
oily complexion but still
have dehydrated skin

How to Identify Dry vs Dehydrated Skin?

Do you experience any of these symptoms?

- Dry, flaking skin
- Irritated skin
- Dull skin
- Make up does not apply well on the skin
- Skincare does not absorb well

If you score **3 out of 5**, you might have dehydrated skin!

Deep Hya-Dration in 3 Steps

NOURISH RiceMoss HyaQuench™

HYDRATE

HyaQuench™

Instantly and deeply hydrate with the HyaQuench™, an innovation of 8 different sizes of Hyaluronic Acid working to target every skin layer.

LOCK

Rice Amylopectin

Inspired by Asia's best kept beauty secrets. Creates the strongest protective wall for the skin to lock in moisture up to 120 hours.

STRENGTHEN

MossCell Technology

The first and oldest plant on earth. Helps strengthen the skin barrier to be more resilient to climate change and environmental aggressors.

Hydrate

HyaQuench™ Deeply activating formula with the smallest size of Hyaluronic Acid.

Proprietary Ingredient from PAÑPURI

- **8 sizes** of Hyaluronic Acid **targeting every skin layer**
- **5kDa:** The **smallest size** for fast and deep penetration into the skin
- **600 times smaller** than common Hyaluronic Acid.
- Acts as a magnet to pull moisture from the surroundings and serves as a water reservoir to regulate and retain moisture in your skin

1 gram of Hyaluronic Acid can attach and hold up to approximately **6 liters of water**

3000kDa

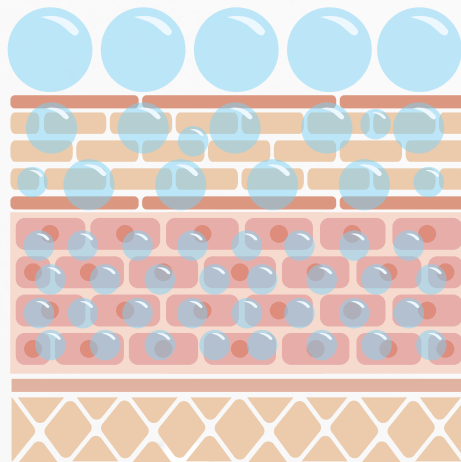

5kDa

(600 times smaller than common Hyaluronic Acid)

YES, Size Does Matter!

With 8 sizes of Hyaluronic Acid

Large Hyaluronic Acid

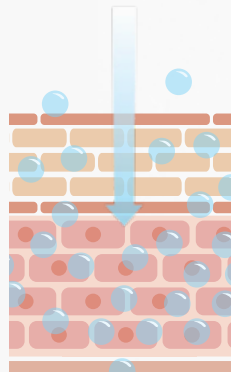

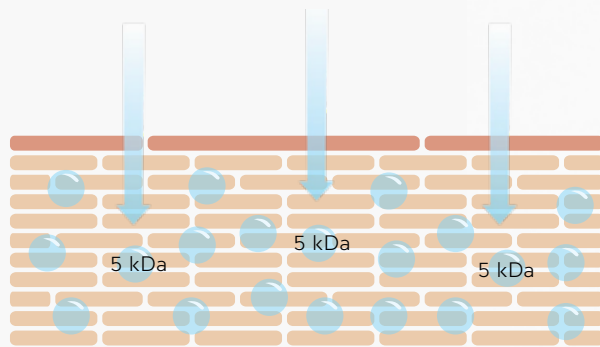

Acts as a glue to adhere to your skin with water from the surroundings.

Oligo - The smallest Hyaluronic Acid

Deeply penetrates your skin to replenish and fix your dehydration issue.

The Smallest Size of Hyaluronic Acid

Fast and deep penetration to all skin layers

New Innovation from PAÑPURI
HyaQuench™

The smallest 5kDa Hyaluronic Acid
Fast-absorbing and deeply penetrates into every skin layer.

Lock

Rice Amylopectin forms the strongest moisture holding matrix on the skin to lock moisture up to **120 hours**

Through various searches across the country, PAÑPURI discovered a species of sticky rice named *Oryza Sativa* Var. *Glutinosa* which contains the richest concentration of Rice Amylopectin.

- Generates protein, lipids (fatty acids) and ceramides that help to protect the skin
- Provides immediate relief for dry skin
- **Moisture holding matrix to lock and seal in moisture for up to 120 hours**

**Inspired by
Asia's Best
Kept Beauty
Secret**

From the northeastern region of Thailand known for its fertile land that grows quality sticky rice.

The source of rice we use is produced and complies with the COSMOS standard for Natural and Organic Cosmetics.

#PATHTOZERO

Another Sustainably-Sourced Collection

ZeroWaste

The Rice Amylopectin used is obtained from food industry by-products and waste products resulting from refining rice grains (known to be highly nutritional), thus helping to reduce food waste.

ZeroHunger

With rice being the most consumed food in the world, especially in Asia, it is in our awareness not to interfere with the human food chain by using the by-products that would have been food waste.

Strengthen

MossCell Technology
Strengthens Skin Barrier

- Awarded Best Active Ingredient in the world in 2019
- An innovative technology that enables a large scale of sustainable moss production
- With its high resilience, **MossCell Technology** helps to strengthen **the natural skin barrier**
- Enables the skin to be **resilient and adaptive to sudden climate change and external aggressors i.e. pollution and UV rays**

The Undefeatable Moss

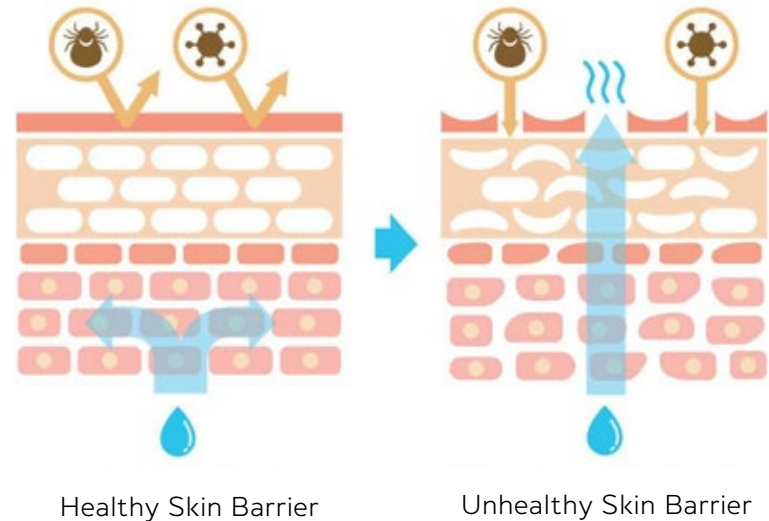

The First and Oldest Plant on Earth

- Having been around for over 470 million years, it's proof that it's very adaptable and can resist climate change and survive until today
- Moss is able to survive several freeze-thawing cycles. This extraordinary resilience is due to the presence of cold genes that are unique to moss
- Moss is a great natural air pollution filter

The Importance of the Skin Barrier

4 skin barrier functions

1. Locks moisture within the skin.
2. Acts as a preventive wall to protect skin cells from microbial, pollution, external aggressor and climate change.
3. Prevents skin cell oxidation.
4. Improves tight conjunction of lipid layer (fatty layer) to prevent sagging skin.

NOURISH RiceMoss HyaQuench™ Watery Milk Oil

YOUR SKIN SMOOTHIE MILKSHAKE FOR
DEEPLY HYDRATED AND NOURISHED SKIN

- Deeply hydrate your skin in 3 steps:
Hydrate, Lock, Strengthen
- Replenish both **oil** and **water** in the skin
- For **plump, hydrated** and **smooth** skin

SHAKE TAP HYA-DRATE

Pre-Serum: A revolutionary **2-in-1 formulation** combining the richness of oil and the power of serum by turning into a milky emulsion when shaken well.
For deeply hydrated and nourished skin.

Supercharge Cream**

Key ingredients

Calendula Oil

- Replenishes oil to the skin
- Enriched with Vitamin E and the highest concentration of fatty acid as linoleic acid
- Comedogenic rating = 0
- Soothes and calms skin

Buchu Leaf

- Balances the skin, reduces sebum production and tightens pores
- Shine and oil control

Buchu Leaf

- Minimizes dry, flaky patches
- Reduces roughness and skin discomfort
- For plump, supple, healthy skin

Key benefits

• Prep the skin before the next treatment

- Replenishes both oil and water to the skin

• Deeply hydrates and soothes skin with light texture

- Gel's cooling sensation
- Reveals plump, hydrated skin with a beautiful matte finish

• Instantly and deeply hydrates with anti-dry patch technology

- Reverses the 5 symptoms of dehydrated skin: roughness, dullness, flakiness, tightness and redness
 - Resulting skin becomes visibly smoother and healthier
-

Skincare FAQ

Similar but Different Serum vs Oil

Oil

- Revives and nourishes for plumper, firmer and healthier skin
- Large molecules to protect the skin from external aggressors
- Absorbs quickly to repair skin

Serum

- Deeply nourishes the skin to target skin worries for visible results
- Small molecules
- Absorbs quickly to repair skin

Duo Skincare to WOW

Because our skin deserves to be protected and repaired, we need both of these duos for maximum efficacy.

Serum

- ArunaYouth™ SOS Serum is formulated with ArunaYouth™ Complex as it is a high-performing key ingredient that helps repair and protect the skin from within

- LOTUS DEFENSE™ Brightening Serum adds brightness while minimizing the appearance of dark spots with key extracts of the lotus flower and lotus seed

Oil

- ArunaYouth™ Bakuchiol Oil has 1.0% concentration of the plant-based Bakuchiol that helps revives and restores collagen to become more youthful overnight

+

- LOTUS DEFENSE™ Face Treatment Oil uses extracts of the lotus and 5 organic oils, such as marula and jojoba, to help bring moisture to the skin

+

What type of moisturizer is suitable for you?

HyaQuench™ Aqua Gel vs Supercharge Cream

NOURISH RiceMoss HyaQuench™ Moisture Supercharge Aqua Grenade Cream

- For Normal-Dry Skin
- Suitable for colder weather conditions
- Perfect for people struggling with dry, flaky skin
- Locks in hydration for up to 120 hours

NOURISH RiceMoss HyaQuench™ Super Aqua Grenade Gel

- For Normal-Oily Skin
- Soothing lightweight gel, absorbs easily
- Suitable for hotter weather conditions
- Locks hydration for up to 120 hours
